

# Summer Math Calendar Entering Fifth Grade Public Schools of Brookline

Get ready to discover math all around you this summer! Just as students benefit from reading throughout the summer, it would also benefit them to engage in math activities. Research shows that students better maintain and strengthen their math skills through regular and meaningful practices. The Math Specialists of Brookline have created this summer math calendar to provide your child and your family with a variety of math activities to explore this summer.

Inside, you will find creative mathematics activities to try at home. The goal is for your child to have fun thinking and working collaboratively to communicate mathematical ideas. The activities reflect a range of difficulty with the intent that your child can choose the activities that are at a “just right” level. While working on these activities, ask your child **how** he found a solution or **why** she chose a particular strategy.

This packet consists of 2 calendar pages (July and August) and an alternate summer math calendar that allows you to fill in your own activities. Each month’s activities are organized into 28 “math boxes.” You can choose which activities you and your child would like to complete on whichever day you want. We encourage your child to complete 20 boxes per month, coloring in each box as it is done. We recommend that you integrate an average of 15-20 minutes of math activities into your child’s day, by completing these activities and reviewing basic facts. Return the signed calendars to your child’s new teacher in September.

We hope that you enjoy the activities, extend them, create new ones, and **have fun!**

Public Schools of Brookline

## Suggested Resources

### Ways to Practice Math Facts (using dice, index cards, deck of cards):

- ✓ Choose multiplication or division math activities on websites (see list of websites)
- ✓ Multiplication or division flashcards—identify a few facts to work on each time
- ✓ Multiplication or division triangle flashcards
- ✓ Flip 2 cards and multiply
- ✓ Practice skip counting by 3s, 4s, 6s, 7s, 8s, or 9s

### Games:

Factors Game\*      Fraction Dice\*

*\*Directions included*

### Additional Games:

Othello, Blink, 1-2-3 OY!

### Books:

<i>One Grain of Rice</i>	Demi
<i>Anno’s Mysterious Multiplying Jar</i>	Anno Mitsumasa
<i>How Much is a Million?</i>	David Schwartz
<i>Lemonade for Sale</i>	Stuart Muprhy
<i>G is for Googol</i>	David Schwartz
<i>If the World Were a Village</i>	David J. Smith

### Websites:

# July

## Entering Fifth Grade Math Calendar

5th

Sunday	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday
<p>Play Pan Balance-Shapes (Fixed Values): illuminations.nctm.org</p> 	<p>Fill in the blanks to make the story true: Mr. Smith has ___ sacks. In each sack, he has ___ boxes. In each box, he has ___ apples. He has 24 apples in all.</p>	<p>Practice your math facts.</p> 	<p>Record the projected high temperatures for the next 5 days. What is the mean, median, mode and range of your data?</p>	<p>Read a math book.</p> 	<p>Play the Factors game. (see directions)</p> 	<p>How much must be added to the following #'s to equal a sum of 100: 48 36 13 74 58 25 15 64 81</p>
<p>It costs \$1.70 to ride the T. If you ride 2 times a day for the month of July, how much would you spend?</p>	<p>Play Fraction Dice. (see directions)</p> 	<p>I am <math>&gt; 3,449</math> and I am <math>&lt; 3,502</math>. I have a 1 in my ones place and a zero in my tens place. What number am I? Create your own number riddle.</p> 	<p>Practice your math facts.</p>	<p>Begin with 35 and count by 7s to 77.  Begin with 36 and count by 6s to 66.</p>	<p>Play a math game.</p> 	<p>Imagine you are sharing one giant cookie among yourself and 5 friends. If you share it fairly, what fraction will each of you receive?</p>
<p>Write 4 number equations for each set of numbers: 8, 56, 7 6, 9, 54 4, 32, 8</p>	<p>Play the Factors game. (see directions)</p> 	<p><math>15 \div 3</math>   <math>18 \div 3</math> <math>21 \div 3</math>   <math>24 \div 3</math> <math>27 \div 3</math>   <math>30 \div 3</math> <math>33 \div 3</math>   <math>36 \div 3</math></p>	<p>Make lists of fractions: ten that are less than <math>\frac{1}{2}</math>, ten equal to <math>\frac{1}{2}</math>, and ten greater than <math>\frac{1}{2}</math>.</p>	<p>Practice your math facts.</p> 	<p>Sophia runs twice as fast as her friend Mia. If Mia runs 3 mph, how long will it take Sophia to run 6 miles? 9 miles?</p>	<p>Read a math book.</p> 
<p>Jose swam 3 laps each day and Micah swam four times as many laps as Jose each day. How many laps did Micah swim in 7 days?</p>	<p>Play a math game.</p> 	<p>Start with 3,542. Add 100 more. Subtract 50. Add 8. What's your number? Is this a square number? Make your own number problem.</p>	<p>Play Fraction Dice. (see directions)</p> 	<p>Play the Lemonade Stand game: www.lemonadestandgame.com</p> 	<p>Practice your math facts.</p> 	<p>Put the following numbers in order from least to greatest: <math>1</math>, <math>1\frac{3}{4}</math>, <math>1\frac{1}{2}</math>, <math>\frac{3}{4}</math>, <math>2\frac{1}{4}</math>, <math>\frac{1}{2}</math>, <math>1\frac{1}{4}</math>, <math>\frac{1}{4}</math>, <math>2\frac{1}{2}</math></p>

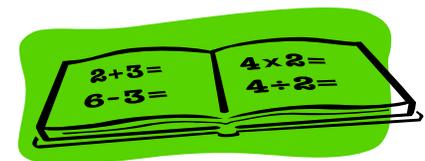

**Did you know?**

The frequency of a cricket chirps fluctuates with the temperature. If you count a cricket's chirps for 15 seconds and add 37, you will have the approximate outdoor temperature in Fahrenheit.

# Fraction Dice

**Object:** Players roll dice to determine the numerator and denominator of a fraction. Players compare the fractions. The player with the larger fraction gets a point for that round. The player who gets 10 points first is the winner.

**Number of Players:** 2 – 4

**Materials:** Dice (or cards marked 1 – 6), paper and pencil for recording the fractions and recording the scores.

## **Playing:**

1. During a turn, each player rolls two dice (or one die two times) to create a fraction. The smaller number rolled must be the numerator, and the larger number is the denominator. Each player writes the fraction on a paper in front of them.
2. The players then compare their fractions to see whose is largest. The player with the largest fraction says, "Mine". If more than one fraction are equal to each other, more than one player can say, "Mine". The player(s) with the largest fraction gets a point for that round.
3. The other players check to make sure it is (they are) the biggest. If another player believes the fraction(s) is (are) not the largest, that player can challenge. With a challenge, if the one who said, "Mine" was incorrect, the challenging player gets the point for that turn and another point for correctly explaining why it was not the largest. If the one who said, "Mine" was correct, that player can get an extra point for explaining why it was the largest.
4. Play continues until one of the players has 10 points.

## **Modifications:**

\*Players can choose to have either number as the numerator or denominator (allowing for improper fractions).

\*When playing with cards, make sure to have 4 of each number (1 – 6) and shuffle all the cards back in after each round. Players then pick two cards to use to make their fraction.

# Looking for apps for math practice?

Here are a few free math apps to check out!

(List begins with the earliest concepts)

**Okta's Rescue** (National Council of Teachers of Mathematics)

**Line 'Em Up** – *order/compare numbers on a number line*

**MathTappers: Find Sums** (iTunes)

**MathTappers: Number Line** (iTunes)

**Learning Center: Geoboard** (iTunes)

**Deep Sea Duel** (National Council of Teachers of Mathematics)

**Door 24 – Math** (iTunes) – *thinking about operations*

**Lobster Diver HD** (iTunes) – *fractions on a number line*

**MathTappers: Multiples** (iTunes)

**Pick-a-Path** (National Council of Teachers of Mathematics) – *thinking about operations*

**MathTappers: Estimate Fractions** (iTunes)

**Equivalent Fractions** (National Council of Teachers of Mathematics)

**Polyup** (iTunes)
