Children's Cochlear Implant Books

There has been a recent surge in the publishing industry when it comes to children's books that talk about cochlear implants and I wanted to share! You can order the books by clicking on the pictures and the best part is that they all cost less than a 1/4 of a tank of gas. :) I have to say that I'm digging the title of the first book for the obvious reason :) And no I had nothing to do with it. The only book that I have read and highly suggest is Rally Caps which I have purchased some time ago and donated to the my local library because I wanted to share it with others. I am planning on doing the same with the others because the more the merrier!

[Abby Gets A Cochlear Implant](#)

Written by [Maureen Cassidy Riski, Au.D., Audiologist](#)

This book illustrates the process of how Abby gets a cochlear implant. The story shows that Abby has a hearing loss wears purple hearing aids, has a progressive hearing loss, and her family chooses a cochlear implant. The story goes on to describe hearing testing, an introduction to cochlear implants, and the steps a family would take to explore this option of habilitation for their child who has a hearing loss...

RALLY CAPS is a humorous, fun-filled baseball and camp story. Ten year old Jordan is injured in an unfortunate and frightening accident while trying out for the Little League Travel team. Recovery is difficult. At summer camp he struggles to conquer his anxiety and fear in order to return to his beloved game of baseball. He forms a friendship with a deaf Italian boy, Luca, who wears a cochlear implant. Luca's compelling positive nothing is impossible attitude, along with the inspiration he draws from his idol, Hall of Famer Cal Ripken Jr., gives Jordan the courage to return to baseball with a passion. Find out what happens as "Rally Caps" are raised in the bottom of the final inning in the biggest game of Jordan's life. Boys and girls alike will enjoy this touching story of persevering through difficult times.

ABOUT ME

Abbie
 New Jersey, United States

Described as a technical abstract work of art, self-sufficient sophisticated woman, a placid creature that unknowingly hunted the knowledge of deafening silence who has nestled herself in the lovely Garden State. Simply described, I am a profoundly deaf 28 year SWF who has a cochlear implant as of August 27, 2007. A date I will never forget. My vocations are a blend of confronting mathematical equations, cracking computer tribulations, and yearning for intellectual conversations. Recent interests include the enjoyment of culinary expression, dynamic color combinations, and the exhilarating feel of wind through my hair. I am fanatical about the intense color of gerbera daisies, the hum of the computer fan, the pitter patter of my puppy's feet. My senses hunger after the heat from the sun secretly creating freckles, the succulent combination of strawberries and chocolate, and the contentment of solving a sudoku puzzle. My only ambition is to revive the sentiment of casual chit chat and the sound of music that brings the beat to the heart.

specialized instruction in listening and spoken language, deaf children can learn to listen and speak, just like their hearing peers. According to the University of Michigan, over 100,000 people have received cochlear implants in the past 20 years. Children with hearing impairment, however, are rarely represented in children's literature and cochlear implant technology is widely misunderstood.
