

Problem of the Week #10: 100 Grapes

On Monday Angela ate some grapes. On Tuesday, she ate 6 more grapes than what she ate on Monday. On Wednesday, she ate 6 more grapes than what she ate on Tuesday. Each day of that week she ate 6 more grapes than what she ate the day before. By the end of Friday, she had eaten 100 grapes in all.

How many grapes did she eat on Monday?
