

Problem of the Week #16: Birthday Trip

Jade's family is planning a trip to her Aunt Mazie's house to celebrate her birthday.

On the first day, they will drive half of the **total** distance.

On the second day of the trip, they'll drive half of the **remaining** distance.

On the last day, they'll drive 45 miles to finish the trip.

How far is the total trip to Aunt Mazie's house?
