

Problem of the Week #17: Pierce Peas in a Pod

The 4th graders planted pea seeds in the Pierce Garden. Ms. Washburn estimated that there are 60 pea plants growing.

If Pierce pea plants grow at the average rate, would they produce enough peas for each student at Pierce to get a pea or a pod?

Note: There are about 700 students at Pierce.
On **average**, a pea plant will have 6 pods with 8 peas.
