

Problem of the Week #19: Walking to School

Annie, Ben and Lin all live on the same street. Their school is at the very end of their street. Annie lives the farthest away from the school and Lin lives the closest to the school.

It takes Annie 10 minutes to walk to Lin's house.

It takes Ben 15 minutes to walk to the school.

It takes Annie 22 minutes to walk all the way to school.

How many minutes does it take for Ben to walk to Lin's house?
