# Problem of the Week #5
## Follow the Pattern

October 12, 2022 can be written 10—12—22.
Did you notice that if you change the first dash to a PLUS and the second dash to be an EQUALS SIGN, you have a true equation?

$$10 + 12 = 22$$

Find ALL the dates, that will occur during the rest of <u>this</u> <u>school</u> year (2022-23), that follow this pattern (month + date = year (last 2 digits)
