

Problem of the Week #5

Palindrome Dates

January						
				1	2	3
4	5	6	7	8	9	10
11	12	13	14	15	16	17
18	19	20	21	22	23	24
25	26	27	28	29	30	31

A **palindrome** is a word or number that reads the same forward or backward. 2021 will have an unusual number of palindrome dates that can be written with either 5 or 6 digits

For example, January 2, 2021 could be written 1-2-21 or 1/2/21 (and if you remove the hyphens, the date reads 1221 in either direction).

What dates in 2021 will be palindromes?

Write as many as you can.

(Hint: there are said to be more than 20 in the year of 2021!)
