Problem of the Week #6
Walking Club

On Monday, Oct. 28th, the Pierce First Grade Walking Club began walking laps at recess.
If the Walking Club walks 4 laps each Monday (when school is open),
and each lap is 1/8th of a mile,
can the members of the Walking Club reach 10 miles before June 1st?

By **what date** do you think they'll walk 10 miles? *(Estimates welcome!)*
