

**Problem of the Week # 9**  
**Meeting Halfway**

At 2:00 Jabari and Jerome began swimming laps at the pool. They started at opposite ends of the swimming pool. After a minute and a half, they passed each other in the center of the pool. Jabari and Jerome didn't lose any time in turning and maintained the same speed.

**What time was it  
when Jabari and Jerome passed each other again in the pool?  
Show your work and justify your thinking below.**
