

Advisory Panel 4: Public Health, Safety, & Logistics

Metrics Review

November 13, 2020

Benchmark (each measured over prior 14 days)	Status 10/28/20	Status 11/4/20	Status 11/11/20
Avg. daily new case count in Brookline = <10	2.1	4.5	7.5
Avg. daily new case count in Massachusetts = <10	11.8	15.3	20.7
Avg. test positivity rate in Brookline = <5.0%	0.25%	0.44%	0.65%
Avg. test positivity rate in Massachusetts = <5.0%	1.55%	1.84%	2.29%

If any two of these four thresholds are exceeded, a more focused discussion should take place about potential pause, roll-back, or other modification of in-person PSB operations.

Updated MA DPH Color Scale

Incidence Rate Color Table

Massachusetts Department of Public Health COVID-19 Dashboard - Thursday, November 12, 2020

Average Daily Incidence Rate per 100,000 Color Calculations

Population					
Group	Under 10K	10K-50K	Over 50K		
Grey	Less than or equal to 10 total cases	Less than or equal to 10 total cases	Less than or equal to 15 total cases		
Green	Less than or equal to 15 total cases	<10 avg cases/100k AND >10 total cases	<10 avg cases/100k AND >15 total cases		
Yellow	Less than or equal to 25 total cases	≥10 avg cases/100k OR ≥5% pos rate	≥10 avg cases/100k OR ≥ 4% pos rate		
Red	More than 25 total cases	≥10 avg cases/100k AND ≥5% pos rate	≥10 avg cases/100k AND ≥4% pos rate		

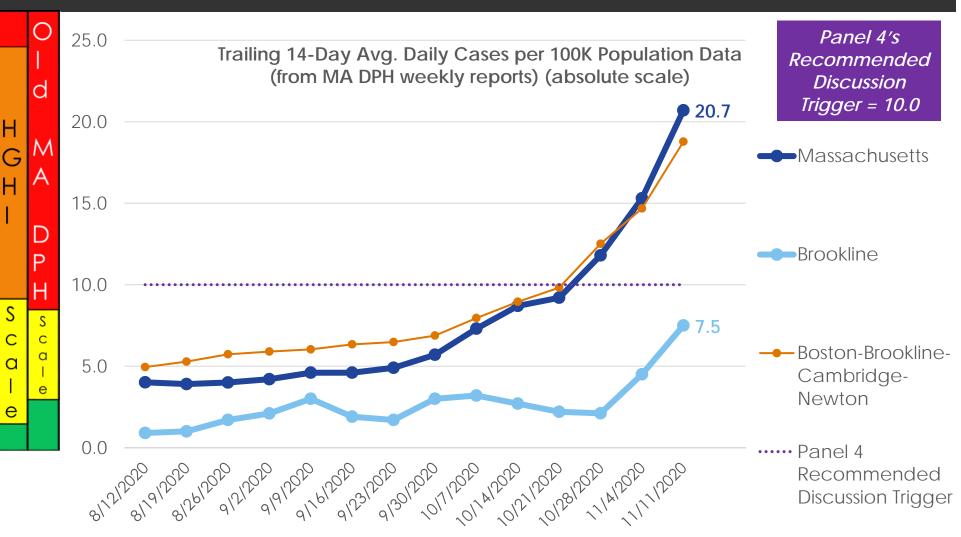

Brookline's population is ~60,000

As of 11/5, DPH is using 2019 population estimates derived from a method developed by the University of Massachusetts Donahue Institute. The 2019 estimates are the most currently available data.

What does the 10 cases/100,000 population metric actually mean?

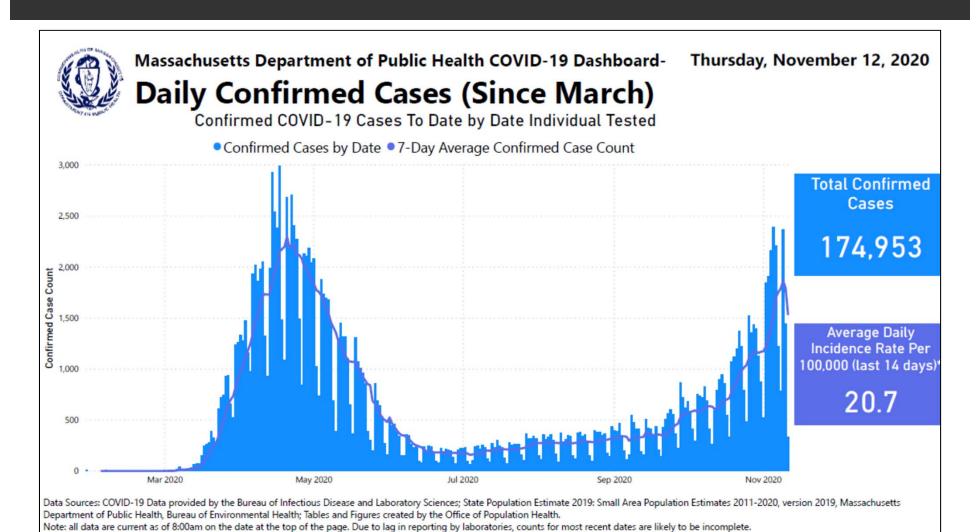

- The metric is based on the average daily new cases over the measuring period (14 days in our case)
- 10 new cases/day per 100k people = 0.01% of the population is being diagnosed COVID+ each day (1 in 10,000 people)

Cohort	Population	Expected New Cases Per Week
Town of Brookline residents	~60,000	Roughly 40
PSB student body	~7,500	Roughly 5
PSB staff	~1,500	Roughly 1

Statewide Test Positivity

Data Sources: COVID-19 Data provided by the Bureau of Infectious Disease and Laboratory Sciences; Tables and Figures created by the Office of Population Health.

Note: all data are current as of 8:00am on the date at the top of the page. Due to lag in reporting by laboratories, counts for most recent dates are likely to be incomplete. This includes individuals who have had more than one molecular test.

New MA DESE Guidance

https://www.doe.mass.edu/covid19/on-desktop/interpreting-dph-metrics.html

Districts are expected to prioritize in-person learning across all colorcoded categories, unless there is suspected in-school transmission, in accordance with DESE's Guidance on Responding to COVID-19 Scenarios. Transmission in schools is defined as spread of the virus between people during interactions in the school setting. While there have been positive COVID-19 cases of staff and students in schools, most of these infections have occurred outside of the school setting. If there is suspected in-school transmission, then the affected classrooms or schools should temporarily shift to remote learning, in accordance with DESE's Guidance on Responding to COVID-19 Scenarios. Classrooms and schools should reopen after appropriate mitigation strategies have been implemented, as determined in consultation with the local board of health, DPH, and DESE.

New MA DESE Guidance, ctd.

https://www.doe.mass.edu/covid19/on-desktop/interpreting-dph-metrics.html

- Districts and schools in communities designated gray, green, or yellow are expected to have students learning fully in-person, if feasible. A hybrid model should be used only if there is no other way to meet health and safety requirements. Parents and caregivers will continue to have the option to choose a district's remote learning program for their children.
- Schools in red communities should implement hybrid models, while maximizing in-person learning time for high-needs students.

. . .

■ Fully remote instructional models should be implemented only as a last resort in classrooms, schools, or districts when there is suspected in-school transmission or a significant municipal outbreak, in accordance with DESE's Guidance on Responding to COVID-19 Scenarios. Classrooms and schools should reopen after appropriate mitigation strategies have been implemented, as determined in consultation with the local board of health, DPH, and DESE.
