

HEALTH REQUIREMENTS FOR NEW STUDENTS ENTERING BROOKLINE PUBLIC SCHOOLS

Student Health Services

Dear Parents/Guardians:

Welcome to the Brookline Public Schools. Our Health Services department invites you to partner with your school nurse in order to promote an optimal educational opportunity for your child that is supported by a coordinated and comprehensive school health program.

Massachusetts Department of Public Health requires that a student may enter school only after the following requirements are met:

- **Health History** completed by parent/guardian prior during registration.
- **Physical Examination** performed and signed by a US health care provider completed within one year *prior* to entry.
- **Lead level and vision screening** completed before entry to kindergarten. Your health care provider is required to test your child’s vision. Please have your PCP include the results with the immunization record or physical exam.
- **Immunization** documentation must be translated and is required before entry. Dates must include month and year and in some cases, exact day may be necessary to fully establish your child’s immune status. (Schedule below).

Please arrange to meet with your school nurse to plan for any special health care needs or for the administration of any essential medications or procedures that are prescribed during the school day.

Massachusetts Department of Public Health School Immunization Regulations
