

The Public Schools of Brookline Surveys were administered online in Spring, 2016 by Panorama Education. All families and staff members in the system were given the opportunity to complete surveys. To maintain privacy, all answers were recorded confidentially. This means that readers will not be able to see how any individual responded to the questions.

The surveys were designed to be used alongside many other sources of data to provide constructive feedback to enable individual schools and the system to reflect on areas of strength and areas for growth. The information included here has been shared with all school and system leaders.

**Driscoll School**

School Type: K-8  
Enrollment: 596

**Respondent Profile:**

Responses: 53 staff (61%)  
233 parents/  
guardians

**How to read this report**

This report is a single piece of information about a complex system. It is designed to give some information on opportunities and challenges in our schools and our school district. This report can tell a reader how a subset of families and staff felt about various aspects of their school and the district at the time they completed the survey. This report does not provide facts and cannot tell a reader whether or not a school is “good”.

Response options were specific to each question but followed the same pattern from “Not at all” as the lowest answer option to “Very much” or “Extremely” as the highest answer option. An example is provided below.

**How healthy is the lunch in the cafeteria?**

<i>Not at all healthy</i>	<i>A little bit healthy</i>	<i>Somewhat healthy</i>	<i>Quite healthy</i>	<i>Extremely healthy</i>
(1)	(2)	(3)	(4)	(5)

- **Quite a Bit to Very Much** indicates the percentage of respondents who selected one of the two highest answer options available for that question.
- **Not At All to a Little Bit** indicates the percentage of respondents who chose one of the two lowest answer options available for that question.
- **Somewhat** indicates the percentage of respondents who selected the middle answer option for that question.
- **Average** indicates the average response based on the numbers assigned to each answer option as seen in the example above.
